

Outside

6 3/4 Remittance Envelope

Red Guides = Bleed (.125" outside)

- Extend elements that will print to the edge of your piece to the red guides.

Black Guides = Trim

Please keep your artwork within the light blue margins.

The blue area represents what is called a "gripper margin". Grippers are mechanical devices used in offset printing to secure the envelope and ensure precise positioning and registration during printing. Placing artwork outside of this area puts your content at risk.

If you need assistance with artwork scaling and placement, just inform your Account Manager or Project Coordinator! Our Creative Department is more than happy to help.
